A strategy for sustainable consumption

Increasing knowledge and deepening cooperation

Encouraging sustainable ways of consuming

Streamlining resource use

Improving information on companies' sustainability efforts

Phasing out harmful chemicals

Improving security for all consumers

Focusing on food, transport and housing

Increasing knowledge and deepening cooperation

- Forum on eco-smart consumption
- Eco-smart behaviour patterns
- Environmental focus in schools

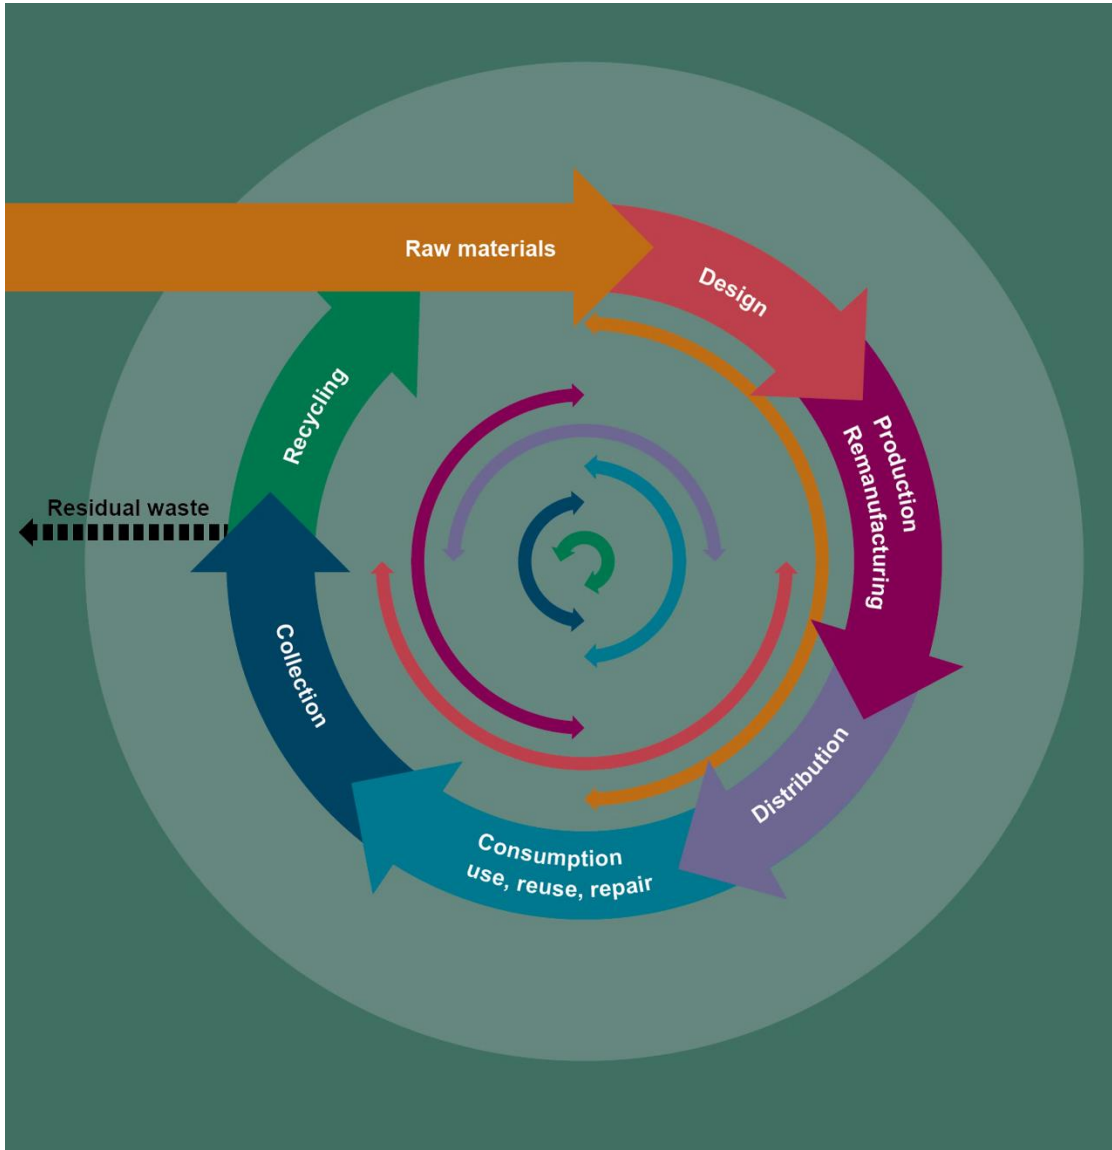

Photo: Maskot / Folio

Streamlining resource use

- Circular economy and collaborative consumption
- Goods that last longer
 - reduced VAT for minor repairs
 - tax reduction for repairs of white goods in the home

Improving information on companies' sustainability efforts

- Businesses' and the financial market's sustainability efforts
- Tougher measures against false green claims
- Mandatory labeling on the climate impact of fuels

Photo: Catrin Arhusiander / Ministry of Finance

Focusing efforts on the largest emitting sectors

- Public transport and cycling
- Refurbishment and energy efficiency
- National food strategy
- Sustainable finance
