

3rd Nordic Workshop on Digital Foundations of Business, Operations, Strategy and Innovation (DBOSI'21)

Call for position papers

Wednesday 10 February 2021 – 14:30 to 17:30 (CET)

Thursday 11 February 2021 – 14:30 to 17:30 (CET)

Friday 12 February 2021 – 14:30 to 17:30 (CET)

This third invitational hands-on and small-scale research paper workshop on digital foundations of business, operations, innovation and strategy will bring together a small group of researchers from information systems, computer science, operations management, innovation, and strategy. The aim of the workshop is developmental and focuses on presenting and sharing early-stage research that both junior and senior scholars are working on in these areas.

Our intent is to bring together scholarly communities, to provide opportunities for knowledge exchange and collegial interactions, and to pool new insights and ideas for future research, all in a friendly and supportive atmosphere. Due to the current public health situation, the workshop will be held online in three sessions in the second week of February.

If you are interested in presenting your ongoing research and getting feedback from leading scholars in the field, please submit an extended abstract of no more than 2000 words (excluding references and tables) via email at research.hoi@hhs.se.

The submission deadline is 18 December 2020 at 23:59 CET. We accept submissions on a first-come, first served basis, as well as on potential and fit with the workshop topic. We will announce the list of accepted papers by 18 January 2021. Please see the [workshop website](#) for more information and submission instructions.

Keynotes: [Geoffrey Parker](#) (Dartmouth College). Additional keynotes (academics and practitioners) to be announced.

Organizers: Magnus Mähring (SSE), Anna Essén (SSE), Michael Barrett (University of Cambridge and SSE)

The three SSE organizers will be supported by an editorial team in selecting papers and shaping the different sessions. The SSE colleagues in this team are Kathrin Reinsberger, Frida Pemer and Claire Ingram Bogusz.

The workshop is organized by House of Innovation at the Stockholm School of Economics and the Swedish Center for Digital Innovation, in collaboration with leading Nordic universities. It follows the two first successful editions of the workshop at Aalto University organized by Matti Rossi, Robin Gustavsson and Kalle Lyytinen.
