PRIVATE SECTOR ENGAGEMENT IN UKRAINE'S RECOVERY AND RECONSTRUCTION

WELCOME

The future of Europe is decided in Ukraine. Supporting Ukraine in defending its sovereignty and territorial integrity, its Euro-Atlantic integration and reconstruction - three inter-related goals - is an investment in the future of the European project. Allowing Putin to succeed in his goal to control and subdue Ukraine in blatant violation of international law, on the other hand, will have fatal consequences far beyond Ukraine's borders. The support to Ukraine should therefore be seen as an investment and not a cost. We can not afford not to support Ukraine in every way possible. The opportunity costs of not doing so will be much higher, in economic and security terms.

Private sector participation, Ukrainian and international, in the reconstruction is crucial for sustainable development of Ukraine to be a prosperous, secure and modern European state. Therefore, the creation of tools to help the private sector to engage is an immediate task for the international community. The Stockholm Centre for Eastern European Studies, the Stockholm Institute for Transition Economies and our partners are proud to support the Swedish Ministry for Foreign Affairs to arrange this conference ahead of the London conference.
