competitive

Content

1. AI in Energy in Ukraine

2. a-Gnostics:

- Pro-gnostics: electricity consumption forecasts
- Di-agnostics: sound analytics for industrial equipment

3. Other vendors and current situation

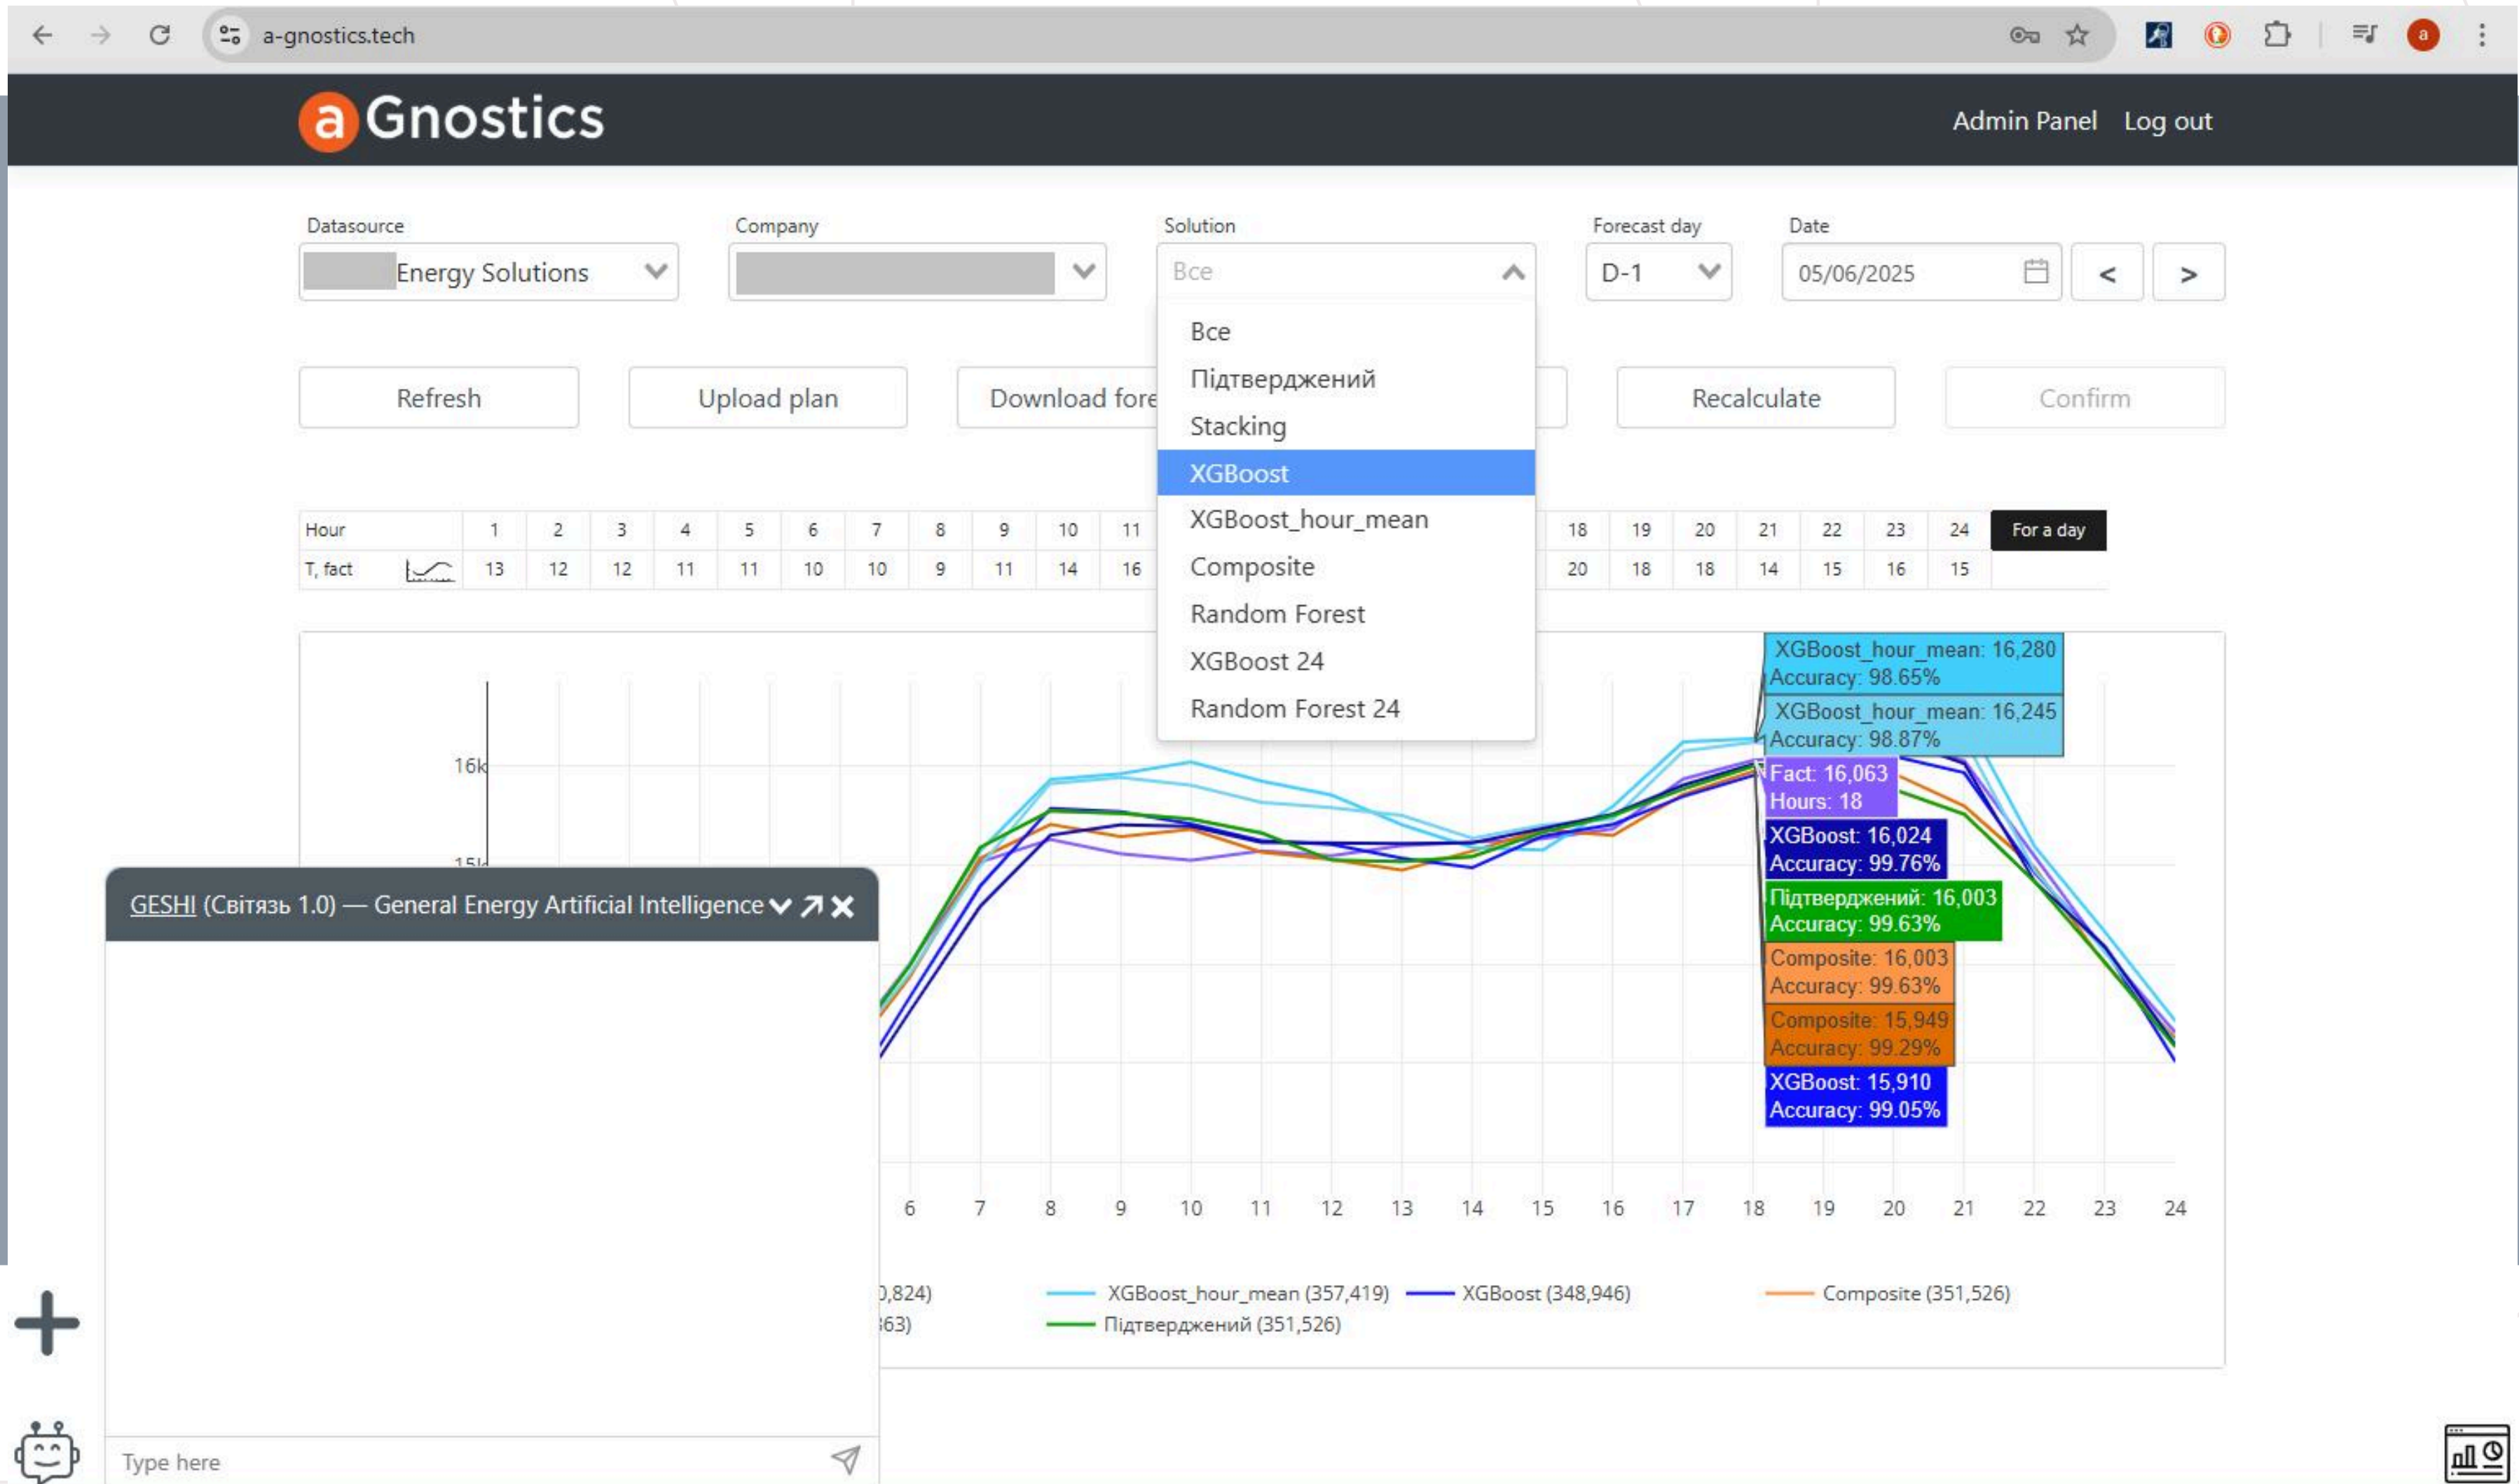

The solutions

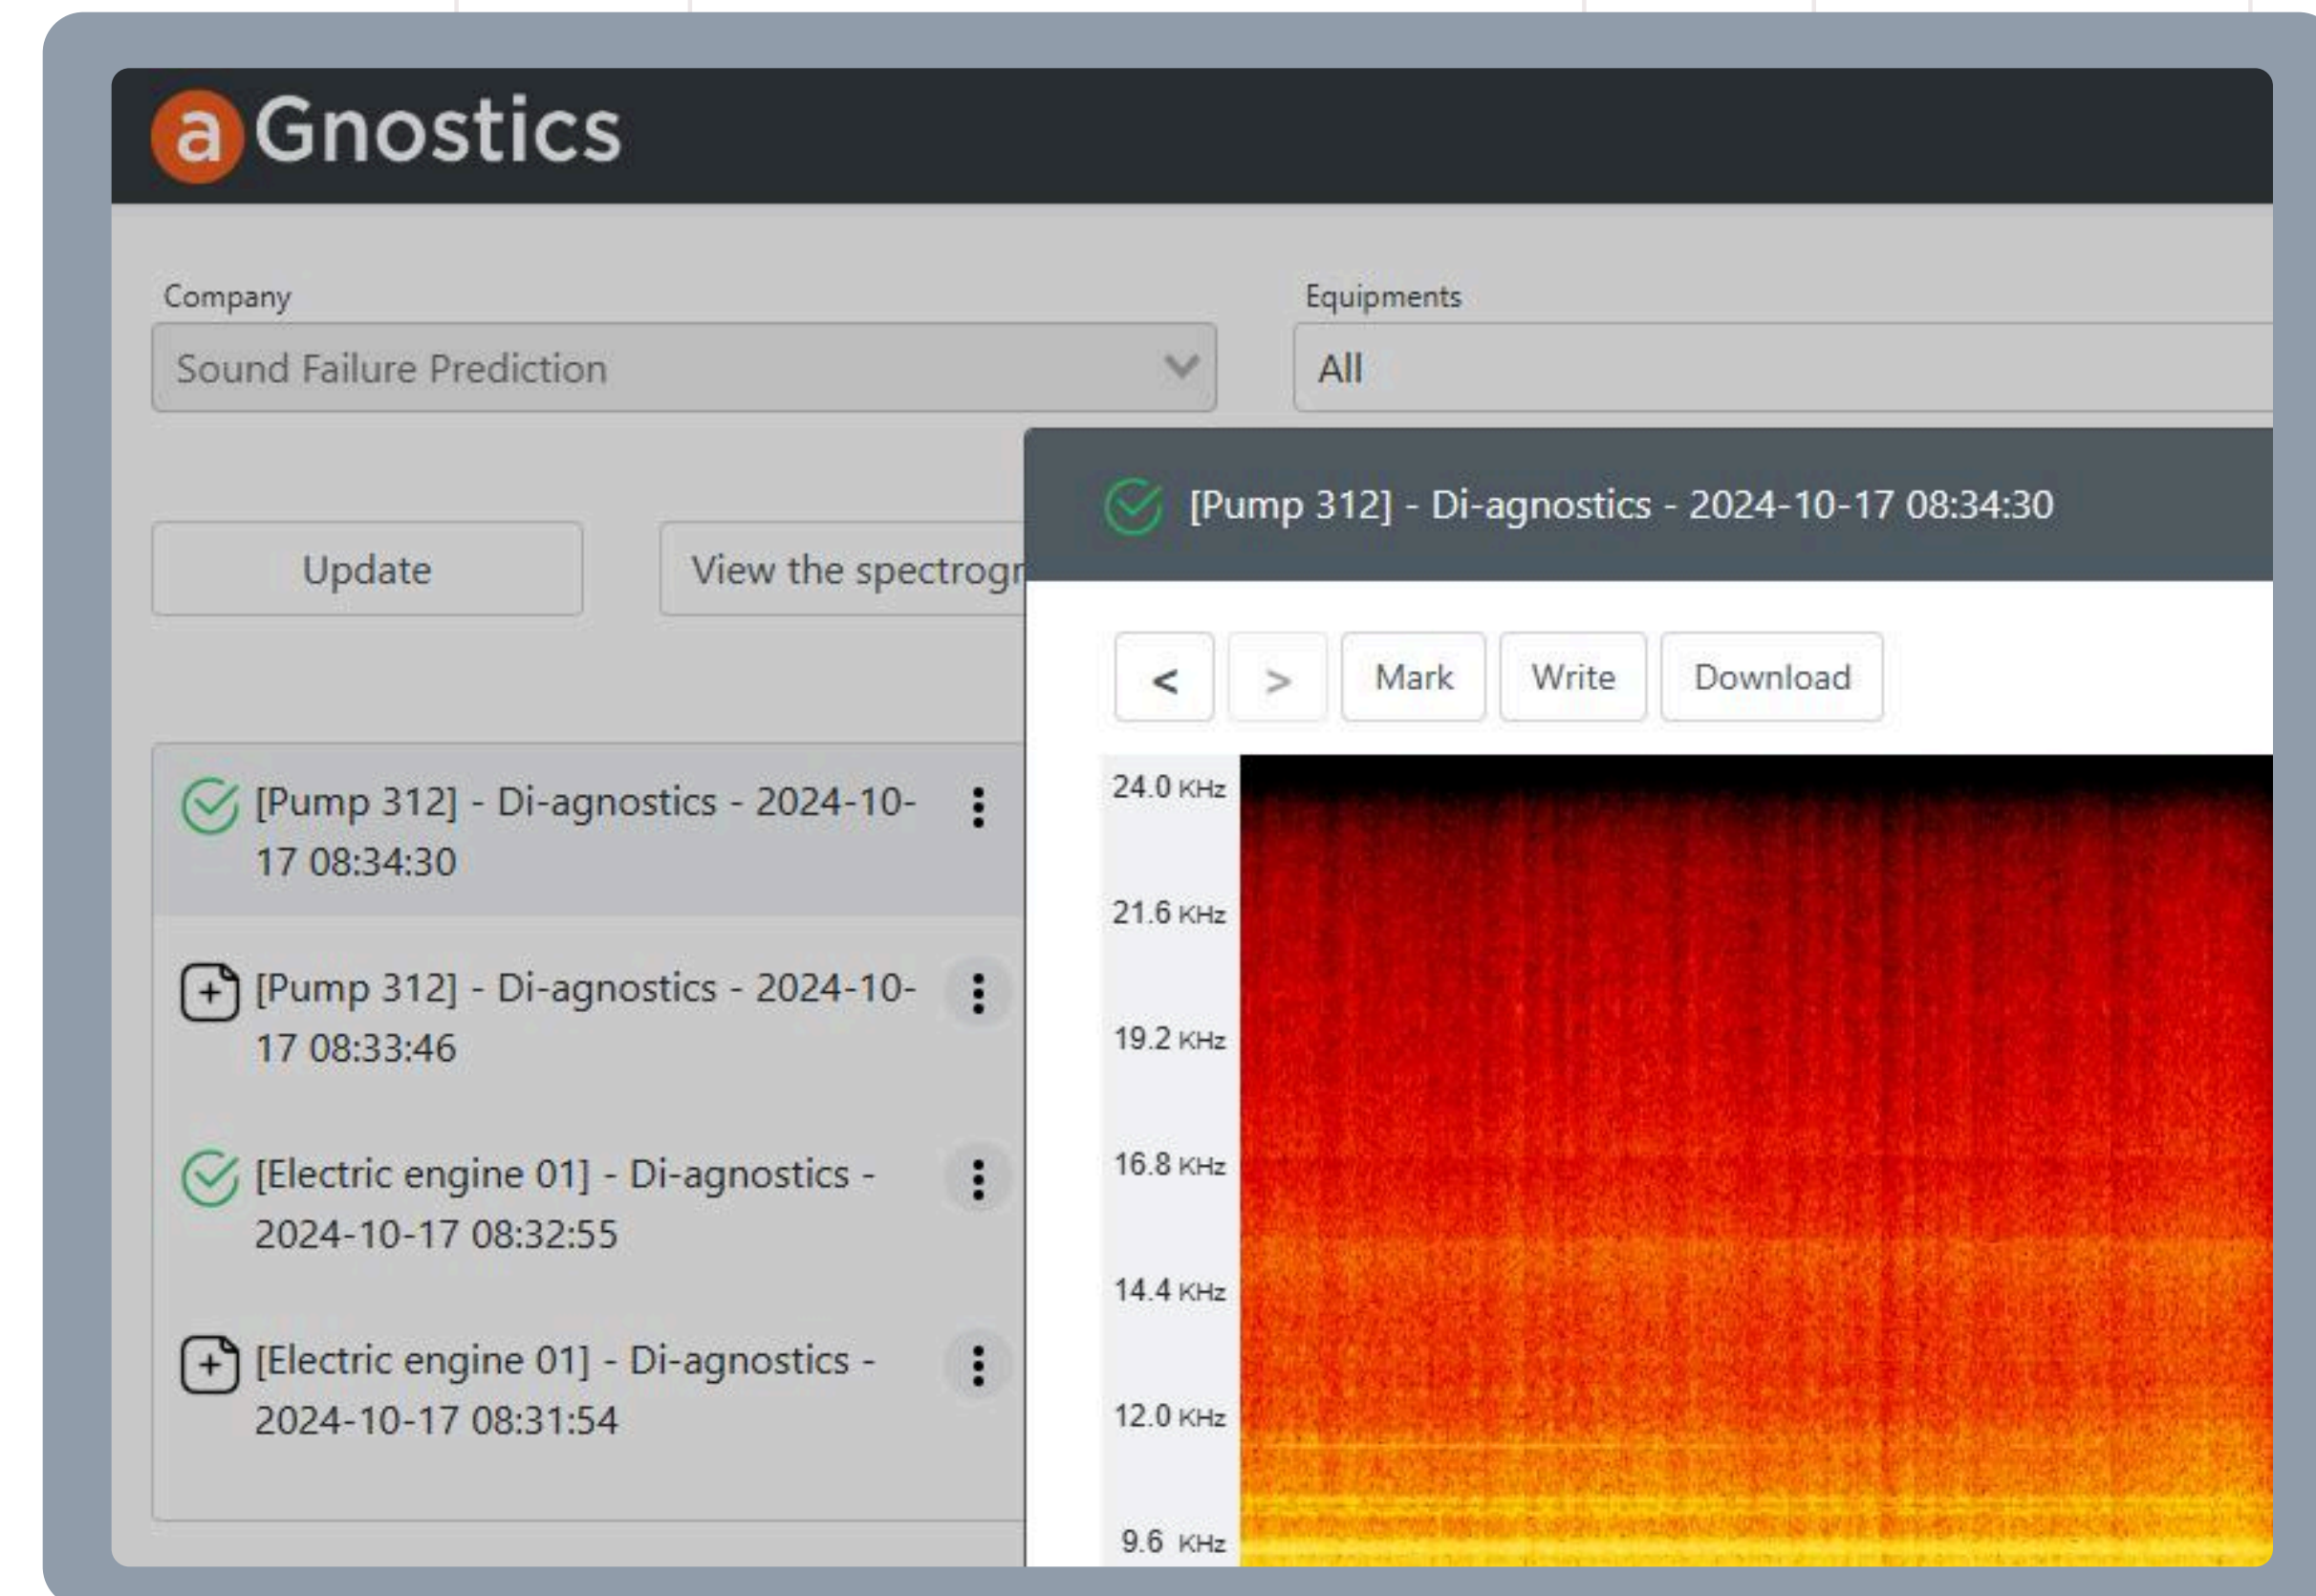

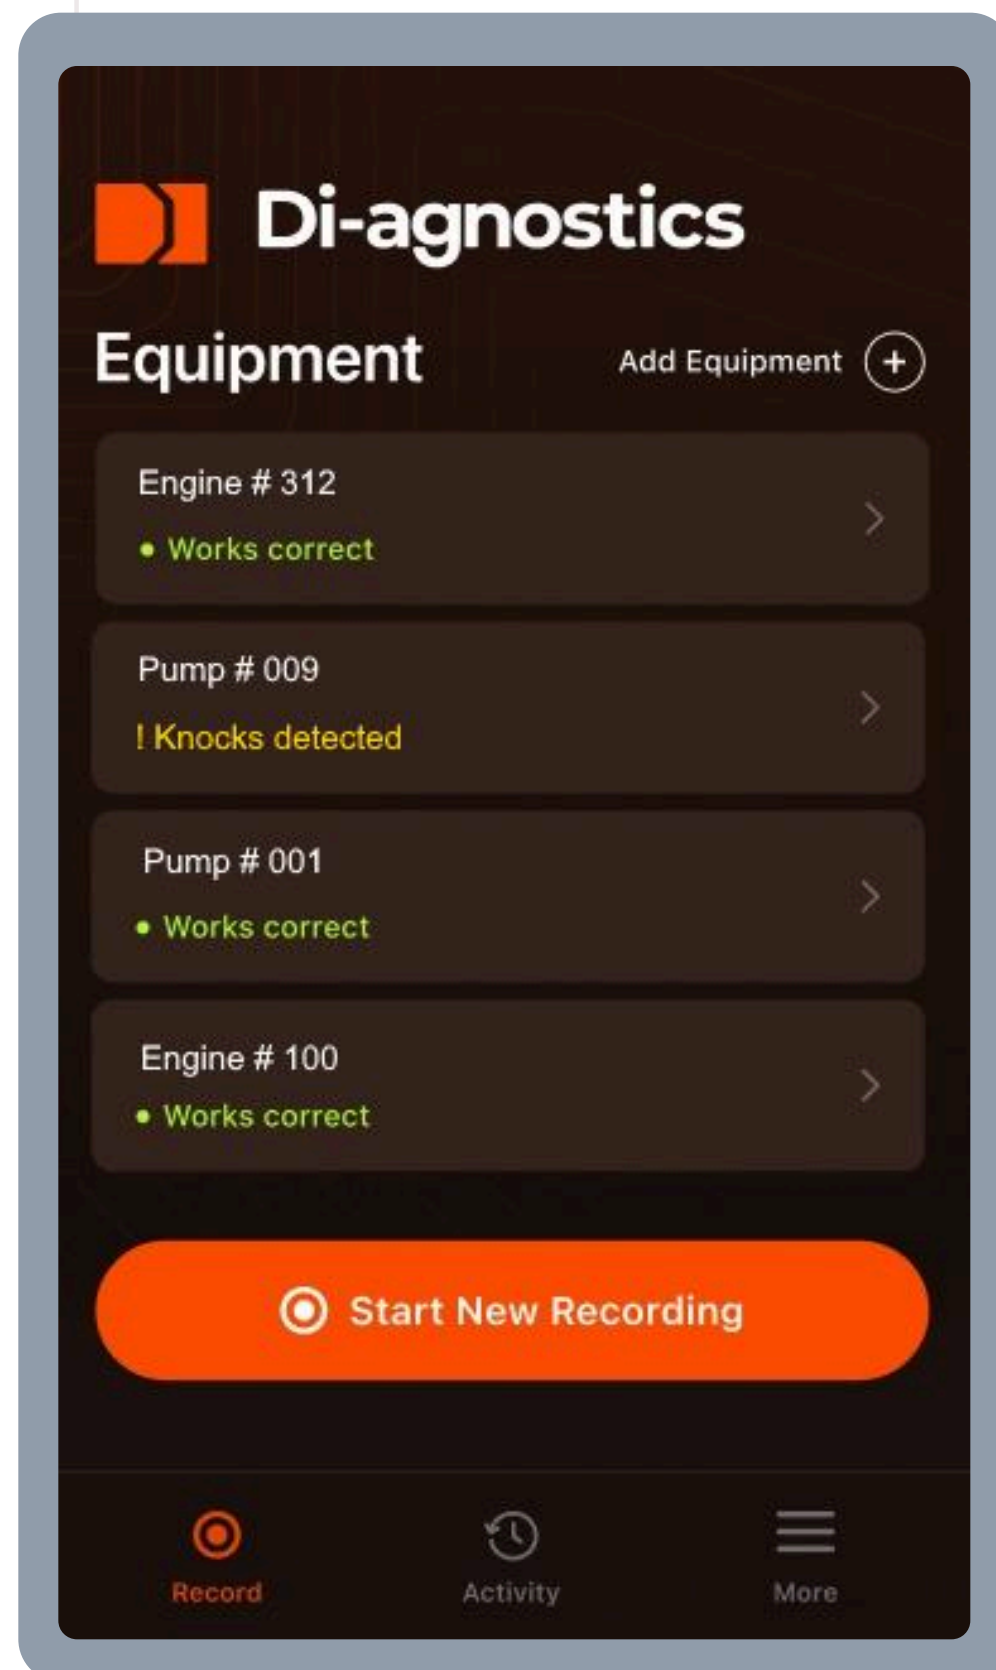

1. Energy Consumption and Generation
2. Equipment Failure Prediction
3. Energy Portfolio Optimization
4. Generative AI and LLMs

-  Accuracy 98%+
-  Large amount of factors
-  600+ AI models at the same time
-  Knowledge transfer
-  Cost and IoT

How Pro-gnostics works

How Di-agnostics works

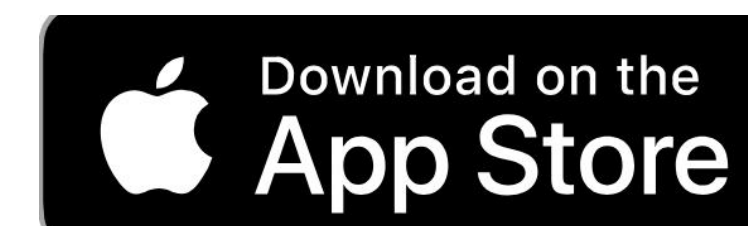

Progress

In 2019 first Enterprise contract
History since 1993

Large enterprises:

1. Energy producers
2. Energy Traders
3. Mining company
4. Agritech companies
